

BLINKIT SALES & OPERATIONS ANALYSIS

PROJECT OVERVIEW

A business analytics project focused on analysing Blinkit's sales performance, product characteristics, outlet performance, and key business metrics using Microsoft Excel and Power BI.

The project involved working with raw business data, preparing and cleaning the dataset, performing analytical calculations, creating PivotTable-based analysis, and developing dashboards to convert data into meaningful business insights.

PROJECT FOCUS

Business Area: Sales and Retail Operations Analytics

Industry: Quick Commerce / Retail

Primary Analytical Tools: Microsoft Excel and Power BI

ANALYTICAL WORKFLOW

Raw Data
